Kanako Suzuki

Last updated: November 2026

About

Master's Student, Waseda University, Japan

Research Interests: Music Information Retrieval, Music Recommendation, Machine Learning, Human-Computer Interaction

Email: kanakowie@toki.waseda.jp

Website: kanako00.github.io

GitHub: github.com/kanako00

Address: Morishima Lab, Waseda University, Tokyo, Japan

Education

Master of Engineering Apr. 2026 – Current

Graduate School of Advanced Science and Engineering, Waseda University

Advisor: Prof. Shigeo Morishima

Bachelor of Engineering Apr. 2022 – Mar. 2026

Department of Applied Physics, Waseda University

Advisor: Prof. Shigeo Morishima

Publications

1. **Kanako Suzuki**, Kosetsu Tsukuda, Takayuki Nakatsuka, Kento Watanabe, Tomoyasu Nakano, Masataka Goto, Keitaro Tanaka, and Shigeo Morishima. "Toward Song Exploration Without Listening Through Lyrics-Derived Linguistic Information." *Proceedings of the 27th International Society for Music Information Retrieval Conference (ISMIR)*, 2026.

2. **Kanako Suzuki**, Kosetsu Tsukuda, Takayuki Nakatsuka, Kento Watanabe, Tomoyasu Nakano, Masataka Goto, Keitaro Tanaka, and Shigeo Morishima. "A Music Exploration Interface Using Lyrics-Derived Linguistic Information for Users Who Want to Minimize Listening to Disliked Songs." *Workshop on Interactive Systems and Software (WISS)*, 2026.

3. **Kanako Suzuki**, Kosetsu Tsukuda, Takayuki Nakatsuka, Kento Watanabe, Tomoyasu Nakano, Masataka Goto, Keitaro Tanaka, and Shigeo Morishima. "A Proposal for Supporting Music Exploration Without Listening Through the Presentation of Semantic Text-based Descriptions from Lyrics." *The 145th Music Information Science Research Meeting*, 2026.

Research Experience

Internship Aug. 2025 – Sep. 2025

National Institute of Advanced Industrial Science and Technology (AIST), Japan

Investigated a music discovery system using semantic text-based descriptions from lyrics.

Internship Feb. 2026 – Mar. 2026

National Institute of Advanced Industrial Science and Technology (AIST), Japan

Investigated the agreement between preferences inferred from lyrics-derived linguistic information and preferences for full lyrics.

Internship Aug. 2026 – Sep. 2026

National Institute of Advanced Industrial Science and Technology (AIST), Japan

Developed a music discovery interface using lyrics-derived linguistic information to help users minimize listening to disliked songs.

Academic Service

Student Online Volunteer 2026

The 27th International Society for Music Information Retrieval Conference (ISMIR 2026)

Technical Skills

Programming: Python, C++, R, JavaScript

Research Areas: Music Information Retrieval, Human-Computer Interaction
